AIRBELT D1 Turbo and D4 Premium

The two AIRBELT D models are powerful, ultra-quiet, full-size canister vacuum cleaners with three on-board attachments, a giant 1.5-gallon bag, an unmatched 40-foot cord and 52-foot cleaning radius, protective rubber-coated wheels, a durable telescopic tube with quick-release connections, and a full bag or clog indicator. A unique tapered suction hose, with a 320° rotating canister connection, increases their airflow velocity, minimizes clogs, and improves maneuverability. They also feature excellent filtration, a push-button cord rewinder, and a soft-foam bumper that protects the vacuum, furniture, and walls from scuffs and scratches.

The AIRBELT D1 Turbo is a straight-suction vacuum that offers an air-driven turbo head for use on rugs, a parquet brush for hard floors, and its suction-control knob is located on the canister body. However, the AIRBELT D4 Premium offers much more! In addition to a parquet brush, it includes the commercial-quality ET-1 electric power head that cleans both carpets and hard floors, has excellent pet hair removal, and the extension side of its L-shaped contour makes cleaning under counters easy. The power head also offers a super-low 3.5-inch horizontal cleaning profile, tool-free brush roller removal, and automatic shut off due to brush roller obstructions. Its foremost feature, a dual-control handle, provides unsurpassed user convenience with an integrated on/off switch for the brush roller, two soft-touch buttons that adjust suction power, and it facilitates effortless control of the power head's 180° steering ability. Suction power can even be optically monitored with its one-of-a-kind LED indicator, located on the canister body.

Three On-board Tools
and a Parquet Brush
are Included with
All AIRBELT D models.

Optional
Canister
Value Pack
#1996PK

Flat-to-the-floor, 3.5-inch Profile – A low, cleaning-head profile makes reaching under furniture and beds easy!

Three Full-size, On-board Tools – A crevice nozzle, an upholstery nozzle, and a dusting brush are always on-board and ready for use. Also, many optional attachments are available that can be fitted to the telescopic tube or the hose handle.

Soft-start Feature – The vacuum's gradual power-up capability extends motor life.

Tapered Suction Hose with Rotating Connection –

The D1 and D4 feature unique tapered suction hoses, which further increases their airflow velocity and minimizes clogs. A brilliantly designed hose-to-canister connection allows 320° rotation of the suction hose, providing easier user movement and machine maneuverability.

Full-size Canister Vacuum – The D4 is a full-size canister vacuum that offers a giant filter bag and an extra-long power cord.

Unmatched, 40-foot Cord and 52-foot Operating Range – Its cleaning radius is amazing! Large areas can be cleaned without changing electrical outlets. Plus, the seven-foot suction hose provides superb user and machine maneuverability.

Push-button Cord Rewinder – Its super-long power cord rewinds by simply pressing a button.

Full Bag or Clog Indicator – When a full bag, clog, or excessively dirty microfilter is detected, an indicator in the window turns orange, which warns the user of inadequate airflow to cool the motor. If this condition persists, its thermal cut-off switch will shut down the motor after a short duration of time.

Patented AIRBELT Bumper – The textile-covered, soft-foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. The bumper also diffuses exhaust air, which contributes to its ultra-quiet performance.

Four Rubber-coated Castor-wheels, Mounted on Bearings and Steel Axles – The rubber-coated castor-wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

Convenient Parking and Storage Aids – After the work is done, the suction hose and telescopic tube, with parquet brush or combination nozzle, can be firmly stored on the canister's underside (shown) or backside housing.

Giant, 1.5-gallon Filter Bag – The large filter bag is convenient and economical because fewer bag changes are needed and closing its built-in hygiene cap prevents dust from escaping during bag disposal.

Three-step Filtration – It features a pre-motor filter, a three-layer AeraPure™ bag, an S-class exhaust microfilter, and a tightly sealed casing, which prevents dirty air from escaping through its seams.

AIRBELT D4 Premium

Durable Power Head with Manual Height Adjustment and Amazing Steering Ability – The D4 model comes standard with the commercial-grade ET-1 electric power head, which is 12 inches wide, effectively cleans both carpets and hard floors, easily removes pet hair, offers four-level manual brush height adjustment, and its 180° steering ability provides amazing maneuverability.

Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off – The ET-1 has easy, tool-free brush roller removal, a handy clog removal door, and a red warning light with automatic shut off, if the brush roller is jammed or obstructed. Also, its warning light remains illuminated during use when brush height is set too high for optimal cleaning, or when the brush roller should be replaced due to excessively worn bristles.

LED Suction-power Indicator – This technology allows the user to optically monitor the vacuum's suction power. When using lower power settings, the LED light rotates slowly. When using higher power settings, the light rotates more quickly. When the power is set to standby mode, the light slowly blinks back and forth, left to right.

Dual-control Handle – The D4's remarkable dual-control handle has two soft-touch buttons that provide convenient suction adjustment, from maximum power for normal cleaning to minimal suction for delicate tasks, such as curtains. The hose handle also offers an on/off switch for the power head's brush roller when straight suction is required, such as cleaning fine rugs.

AIRBELT D1 Turbo

The AIRBELT D1 Turbo is a straight-suction vacuum, so it differs from the AIRBELT D4 Premium as follows:

Turbo Head and Parquet Brush, but No Power Head – The D1 has a telescopic tube and suction hose without an integrated power cord, so it does not accommodate an electric power head. Instead, it comes with an air-driven turbo head for rugs and a parquet brush for hard floors.

Suction-control Knob on Canister Body – Because the D1 has a hose and telescopic tube without a power cord, its suction-control knob is located on the canister body, not the handle, and an LED light illuminates when it is powered on, but it does not include the optical suction-power indicator available on the D4.

STANDARD FEATURES OF SEBO VACUUM CLEANERS

Designed and Manufactured in Germany – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

World's Best Pet Vacuums – Because of superior power head and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

Reliable, Commercial-grade Components – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

Rubber Wheels and Soft Bumpers Protect Homes –

Smooth-gliding, rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the power heads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-roller Technology – SEBO's brush rollers are uniquely designed to funnel hair and debris into the power head's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Save Money! SEBO Vacuums Last for Years and Extend Carpet Life! – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars, by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

Changing Bags is Easy and Clean – SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Bagged vs. Bagless . . . Bags are Better! – Top-fill, three-layer AeraPure™ Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

THE ONYX COLLECTION PROMOTES SEBO'S FREE WARRANTY BONUS!

All SEBO vacuum-cleaner models offer standard warranty coverage of seven years on motors and five years on non-wear parts and labor charges. However, the purpose of the Onyx Collection is to promote SEBO's **FREE WARRANTY BONUS** that extends factory warranty coverage to a total of ten-years motor, ten-years non-wear parts, and seven-years labor!

Onyx Collection vacuum cleaners are **sold exclusively in-store** by SEBO's "Authorized Dealers," but never online. The reason for the Collection's in-store exclusivity is to ensure that buyers have on-site dealer assistance with their Bonus Registrations. Using a dealer-supplied code and the store's name and address, buyers obtain their extended warranty coverage by completing a simple online registration, located at www.sebo.us. Immediately thereafter, new 10/10/7 Warranty Certificates are sent to buyers via e-mail.

The **WARRANTY BONUS** can be applied to all SEBO vacuum cleaner models of any color, not just the Onyx Collection units (power heads sold separately are excluded).

PLEASE NOTE: The **FREE WARRANTY BONUS** **does NOT apply** to SEBO vacuum cleaners purchased from "Third-party Websites," such as **Amazon and Walmart.com**, because they have many **UNAUTHORIZED SELLERS** with false, hidden, or disguised identities, which means they have no access to genuine replacement parts, factory-trained technicians, and labor-cost reimbursements!
